Company
enÉrgia

**Location**

Huntstown Power Station, Dublin or Newforge Lane, Belfast

Contract Permanent - Full Time

Working Hours 39 hours - Monday to Friday

Hybrid Working 2 days working from the office and 3 days working from home

Energia Group is a leading energy company with substantial businesses in both RoI and NI, dedicated to playing a key role in decarbonising Ireland's energy system.

Operating through three key business units - Renewables, Flexible Generation, and Customer Solutions (Energia in RoI and Power NI in NI) - we provide advanced energy solutions and technologies through our brands, Energia and Power NI.

Energia Group have invested €3bn into our Positive Energy investment programme, focused on renewable energy projects. Ongoing projects include onshore and offshore wind, solar, battery storage, and green hydrogen, and it is anticipated this programme can add around 2.6 GW of additional renewable capacity to the system by 2030 to facilitate the achievement of Government targets and keep momentum towards the overall objective of Net Zero.

Currently our Renewables business owns and operates 309MW of wind assets and purchases electricity from 1,247MW of renewable generation capacity throughout Ireland. We are progressing with further onshore windfarms, solar farms, hydrogen production and battery storage to help decarbonise the energy system. We are looking for people who want to create impact in their roles and are energised to achieve their personal, professional and aspirational goals throughout their career with us.

At Energia Group, we are dedicated to driving Ireland's renewable energy future while supporting local communities through partnerships and initiatives such as employee volunteering programmes and community benefit funds.

Proudly led by experts and home to many future leaders, our talented employees are our most valuable assets. We invest in their development through various Learning and Development Programmes to nurture sustainable careers and support our employees' personal development plans.

With our People Strategy, we prioritise a safe and inclusive work environment, supporting employees at every stage of their careers. We are committed to diversity and inclusion, signatories to the elevate pledge, and hold the Bronze diversity mark.

We are looking for people with positive energy, who want to make an impact in their roles through a meaningful career with us.

About the role

Reporting to the O&M Engineering Manager, this key role will support the team through developing and maintaining the asset management system, and further processes in relation to compliance, risk management and continuous improvement.

The Operations Engineer will have responsibility for ensuring all site operations and maintenance activities comply with internal policies and procedures as well as external regulations. This role will ensure consistency across all sites with the implementation of health, safety and environmental procedures.

Responsibilities

Day-to-day, here's what your new role would look like:

- Continuously promote and maintain a compliant health and safety culture within the team.
- Development of management systems and improvements in line with AM ISO55001 recommendations.
- Promoting awareness of Asset Management and the Asset Management Policy.
- Liaise with wider team to manage and resolve defects, technical issues, RCAs through contract agreements.
- Liaising with key internal and external stakeholders.
- Producing daily / monthly / annual reports for senior management.
- Preparation of information for monthly and technical reports.
- Assisting in the management of the handover of new assets coming into the Renewables Operations remit.
- Providing a single point of contact within the Asset Management team for all designated projects from Development to Operations.
- Contributing input for Employer Requirements and works information.
- Ensuring the construction quality meets the necessary criteria outlined in the detailed design.
- Tracking, reporting and escalating any issues with project deliverables as defined by programme and takeover criteria.
- Ensuring all risks are managed, mitigated and accepted by the Asset Management team.
- Assisting with and / or providing cover for other H&S or Operational duties as required.
- Supporting optimisation of lifetime O&M and Asset Management planning.
- Ad hoc project management as business projects arise.
- Ensure all O&M activities are conducted in strict compliance with EnÉrgia Safety Rules.

About you

Key Criteria – What You'll Need

- Relevant technical qualification or operational experience of renewable generation technologies.
- Reporting and documentation skills with previous experience of drafting and monitoring work practices and procedures.
- Project management experience with excellent IT and communication skills.
- Full drivers licence with ability to travel as and when required by the business.

Desirable Criteria - These help decide between those who meet all the above key criteria:

- Experience of working in the renewables field.
- Experience operating to safety rules or safe system of work.
- Knowledge of ISO 55001 Asset Management Standard and experience of CMMS or Asset management system (Maximo or other).
- Previous experience in a due diligence, technical advisor, owners engineer or an asset management role.

If you are enthusiastic about this role but don't meet every single requirement, we still encourage you to apply. Your past experiences might be the perfect match for this or other positions, making you the unique talent we're looking for.
